

National Pollution Prevention (P2) Week
Pollution Prevention Fair
September 19, 2000

"Prevent Pollution at the Source"

- ❖ Pollution Prevention Week (September 18 – 24) is a nationwide effort to increase awareness of the many opportunities to practice pollution prevention.
- ❖ We are pleased to invite you to participate in a Pollution Prevention Education Fair where you will have the opportunity to obtain information from City, County, State and Federal agencies on how to successfully integrate P2 practices into your everyday life.

- ❖ Reducing, reusing and recycling are more than effective tools for protecting the environment, these practices can help you save money and time by reducing the need to manage waste.

- ❖ The primary method for improving California's water, soil and air is by reducing the amount of pollution generated in the home, in the garden, on the road and in the workplace.
